Delivering a solid quarter

HIGHLIGHTS SECOND QUARTER 2006:

- 96 million mobile subscriptions
- Revenue growth of 37% underlying growth of 12%
- EBITDA margin increased from 34% to 35%
- Strong operating cash flow

We are delivering yet another solid quarter, with high growth in revenues and increased EBITDA margin. We are very satisfied that several of our mobile operations are performing so well in their markets. In particular, GrameenPhone improved its market position by increasing its customer base by more than 30% during this quarter alone. DTAC also increased its market share, but is facing price erosion in the Thai market. In the second quarter, the companies in which we have ownership interests increased the number of mobile subscriptions by 6 million, reaching a customer base of 96 million.

President and CEO Jon Fredrik Baksaas

We are constantly evaluating how we can improve our performance. This can be seen in the strong margins within our mobile operations and the positive cost development in Fixed Norway. In Sweden, following recent acquisitions, we will reorganise the operations in order to reach our goal of becoming a leading provider of communication services', said President and CEO of Telenor, Jon Fredrik Baksaas.

The provisionally purchase price allocation of Mobile Sweden has been revised during the second quarter of 2006, which has resulted in a negative adjustment of EBITDA and depreciation and amortization for the first quarter of 2006 of NOK 31 million and NOK 25 million, respectively. - ARPU in local currency increased by 7% mainly due to increased average usage of voice and SMS, which lead to a 6% increase in total revenues measured in local currency.
- EBITDA increased primarily due to growth in revenues. In addition, the first quarter of 2006 included costs related to workforce reductions.
- In 2004, the Swedish regulatory authorities decided to reduce the interconnection charges in the Swedish market for mobile telephony. The regulator stated that the price cap should be SEK 0.64 with effect from 1 July 2006. The new interconnection charge is applicable for TeliaSonera, Tele2 and Telenor. Telenor does not agree with the new rates and will give a response to the regulator.

- The Thai regulator, NTC, has proposed new and more restrictive foreign ownership and management control rules, but states that the proposed draft regulations would need further public consultations.
- NTC issued the interconnection framework on 17 May and operators submitted their Reference Interconnect Offer (RIO) to the regulator on 1 June. There is now an interactive process with the regulator until 1 September before an eventual approval of the RIO. Once approved, the concessionaries' RIO, bilateral negotiations will start with the seven other mobile and fixed operators in Thailand.

Fixed - Norway

- The trend from previous quarters continued with an increase in the number of xDSL and VoIP subscriptions and a decrease in the number of PSTN/ISDN subscriptions.
- Telenor's estimated market share for xDSL in the retail market was 58%, in line with previous quarters. Measured in traffic minutes, Telenor's estimated market share was 65%, in line with the first quarter of 2006.
- Revenues decreased by 8.8%. Adjusted for the sale of contractor business in the second quarter of 2006, revenues decreased by 6.7%.
 Adjusted revenues in the first half year of 2006 decreased by 3.3% compared to the first half year of 2005.
- Revenues from telephony decreased due to a reduction in the number of subscriptions and lower traffic volumes. The number of subscriptions decreased primarily due to migration to VoIP telephony with other fixed network operators as well as a decrease in the total market for fixed telephony subscriptions. Decreased traffic volumes were due to the decrease in the number of telephony subscriptions and the number of voice minutes per subscription. The latter was mainly due to migration of voice traffic from fixed to mobile telephony.
- Revenues from xDSL/Internet increased due to growth in the number of xDSL subscriptions. This was partially offset by lower revenues per subscription and a reduction in revenues from Internet traffic and Internet subscriptions.
- The decrease in revenues from Data services was due to lower revenues per subscription partially offset by an increase in the number of subscriptions.
- Wholesale revenues decreased mainly as a result of a fall in contractor revenues due to outsourcing from 1 April 2006.
- The increase in EBITDA margin was due to a reduction in operating expenses as well as a shift in the revenue portfolio towards products with higher gross margin.
- The decrease in depreciation and amortization was primarily due to lower capital expenditure in recent years. This was partially offset by increased amortization for expenses associated with transactions that provide the rights to use assets, such as local loop unbundling.
- Capital expenditure decreased mainly due to reduced investments in broadband coverage and IS/IT.
- From 1 June 2006, the prices for unbundled access to the local loop were reduced in accordance with the instruction from the Ministry of Transport and Communications. The price for full access was reduced by NOK 30 to NOK 105 per month.

- Revenues in Telenor AB decreased, primarily due to decreased revenues from wholesale telephony.
- In Telenor AB, EBITDA increased and turned positive as a result of increased gross margin for voice traffic and xDSL and a reduction in operating expenses. EDB Business Partner

- Revenues increased mainly due to acquisition of operations in the fourth quarter of 2005 and the first half year of 2006. In the second quarter of 2006, EDB acquired Guide Konsult for a total consideration of NOK 566 million.
- EBITDA decreased mainly due to lower sales of maintenance contracts partially offset by EBITDA from acquired operations.

Satellite Services

 Increased revenues were primarily due to growth within the VSAT business, partially offset by decreased revenues in the Inmarsat segment due to lower volumes and prices. Operating profit was in line with the second quarter of 2005.

Venture

 The increase in revenues was primarily due to acquisition of new business within Opplysningen in the second half of 2005. Operating profit decreased primarily due to the new business.

Corporate Functions and Group Activities

• The increased EBITDA loss is largely due to less gain on sales and lower intra-group revenues.

¹⁾ For certain associated companies, financial statements as of the Group's balance sheet date are not available. In such instances, the most recent financial statements (as of a date not more than three months prior to the Group's balance sheet date) are used, and estimates for the last period are made based on publicly available information. Actual figures may deviate from the preliminary figures. The consolidated profit and loss statement contains only the line 'Net result from associated companies'. The preceding table includes Telenor's share of profit after taxes from DTAC and UCOM until 1 November 2005. Thereafter DTAC is consolidated, while UCOM is treated as a discontinued operation. Glocalnet is included until 28 February 2006. Thereafter Glocalnet is consolidated as a subsidiary.

- At the end of the second quarter of 2006, Telenor's ownership interest in VimpelCom in Russia was 29.9%. The value of Telenor's share of the company, based on the quoted share price as of 30 June 2006, was NOK 17.5 billion. According to telecom analysts, VimpelCom had approximately 51 million mobile subscriptions at the end of the second quarter of 2006.
- On 6 July 2006 VimpelCom announced that it had received the final decision of the review of VimpelCom's 2003–2004 Russian tax filings. VimpelCom informed that of the total claim of RUB 1,809 million in taxes and fines, the total net amount to be paid is RUB 652 million. VimpelCom states that it does not agree with the claims and plans to subsequently appeal its position in court. Telenor cannot make any reliable estimate of the net effect of the tax claim and has not made any adjustments to the results from associated companies in Telenor's consolidated financial statements.
- On 1 June 2006 VimpelCom withdrew its proposal to both Telenor and Altimo to acquire 100% of Kyivstar for USD 5 billion. Telenor has stated that a market-based separation agreement between Telenor and Altimo and the associated Federal Anti-Monopoly Service (FAS) approvals are necessary conditions to the sale of Kyivstar to VimpelCom.

- Increased financial expenses were due to increased long term interestbearing liabilities following the acquisition of businesses.
- Change in fair value of financial instruments was primarily related to interest rate derivatives used for economic hedge of interest-bearing liabilities that do not fulfil the requirements for hedge accounting.

Taxes

- The nominal Norwegian corporate income tax rate is 28%. The effective tax rate for the Telenor Group for the fiscal year 2006 is estimated at approximately 27% of profit before taxes and minority interests. The gain on sale of shares in Inmarsat in the first quarter of NOK 1.8 billion is not taxable. Adjusted for this gain, the effective tax rate for 2006 is estimated at approximately 30%. The effective tax rate is also affected by taxes related to companies outside Norway and non-deductible expenses.
- The actual effective tax rate for 2006 may deviate from the estimated rate.

Balance sheet

• Net interest-bearing liabilities increased by NOK 3.3 billion in the quarter to NOK 38.2 billion as of 30 June 2006. The Annual General Meeting (AGM) of Telenor at 23 May 2006 declared dividends of NOK 3.4 billion, of which NOK 3.2 billion was paid in the second quarter of 2006. In addition, shareholders equity was reduced and short-term interest-bearing liabilities increased by NOK 0.8 billion as a result of the AGM's approval of the redemption of shares owned by the Kingdom of Norway. The AGM decided further to cancel 12.1 million of Telenor's own shares. After the cancellation of these shares and the redemption of shares owned by the Kingdom of Norway, the total number of outstanding shares will be 1,680,274,570. The AGM

authorized the Board to acquire 165 million of Telenor's own shares. As of 30 June 2006, Telenor had not made any purchase of its own shares according to the new authorization.

 Translation differences reduced equity in the second quarter of 2006 by NOK 1.3 billion, due to the appreciation of the Norwegian Krone compared to most of the functional currencies of Telenor's foreign subsidiaries and associated companies as of 30 June 2006 compared to 31 March 2006, of which Pannon contributed the largest amount.

Outlook for 2006

We are maintaining our outlook from the first quarter.

- The strong growth in mobile subscriptions during 2005 gives Telenor a solid foundation for further growth in revenues. We expect a growth in reported revenues of around 30%.
- We expect a continued high growth in EBITDA, in particular driven by the international mobile operations. Telenor will continue previously introduced initiatives and identify new means of improving cost efficiency. We expect the EBITDA margin before other income and expenses for 2006 to be above 34%.
- We expect high capital expenditure to continue, and capital expenditure as a proportion of revenues is expected to be above 20%. Capital expenditure is expected to continue to be driven by high subscription growth within Telenor's mobile operations in emerging markets.
- A growing share of Telenor's revenues and profits is derived from operations outside Norway. Currency fluctuations may to an increasing extent influence the reported figures in Norwegian Krone. Political risk, including regulatory conditions, may also influence the profits. We expect seasonal variations between the quarters.

The accounts submitted with the report have not been audited. This report contains statements regarding the future in connection with Telenor's grow th initiatives, profit figures, outlook, strategies and objectives. In particular, the section "Outlook for 2006" contains forw ardlooking statements regarding the group's expectations. All statements regarding the future are subject to inherent risks and uncertainties, and many factors can lead to actual profits and developments deviating substantially from what has been expressed or implied in such statements.
